# PROBLEM - SOLUTION FIT FOR WEB PHISHING

**PROBLEM:**

**1)Embedding link in an email that redirects the user to unsecure websites that requests sensitive information.**

**solution:**

**Educate the users/clients and conduct training sessions with mock phishing scenarios.Deploy SPAM filter that detects viruses and blank senders.**

**PROBLEM:**

**2)Attempting to obtain company information over the phone by impersonating a known company vendor or IT department.**

**Solution:**

**Encrypt all sensitive company related information. Require encryption for employees that are telecommuting.**
